MANAGEMENT

NZARM 57th Annual Conference

Resource Management in Canterbury – More than just water!
21-23 September 2010

Day 1: Commodore Airport Hotel, Christchurch
Day 2-3: Return fieldtrip to Kaikoura

The New Zealand Association of Resource Management promotes the views and interests of those engaged in the area of natural resource management. The annual conference is one way in which the Association promotes communication and the transfer of information between members, other resource management practitioners, concerning resource management.

'Resource Management in Canterbury – more than just water!'

This year's theme '**Resource Management in Canterbury – more than just water!**' recognises that water management means more than just quality and quantity. It has an effect on all the natural resources that NZARMer's manage and can have huge economic, social and cultural consequences.
